

Boobie Latte & Boobie Choco-Latte

Why Choose Milksta Boobie Lattes?

Milksta Boobie Lattes are one of a kind! These delicious, decaffeinated drinks provide breastfeeding/lactation support, even boosting milk production through the power of Moringa leaves, all whilst satisfying coffee cravings. Moms love coffee and are always telling us how much they miss it, especially when lactating. We've made sure they're able to have it without any guilt or worries about allergens or contaminants. Safe for them and their babies.
